Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hay et al (US Patent 4,834,371) in view of Blaustein et al (US Patent 5,885,128) and Lindman (US Patent 3,091,459).

Hay et al teaches most of the elements of the claimed invention, including a doll having at least one ferrous portion (11), a manipulator (4), a stage (2), a backing (7) and at least one shoe accessory (10). However, Hay et al fails to teach a plush doll and the shoes removable attached to the doll's feet. Blaustein et al teach that it is known to provide a toy with plush material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the doll of Hay et al plush as suggested by Blaustein et al for the purpose of providing animated movement of body appendage of the toy. Further, Lindman teaches a magnetic game wherein a player, such as element 146, is manipulated by a handle (170) having a magnet (175) attached thereto. The magnet is carried within the player (col. 11, par. 5). It would have been obvious to one having ordinary skill in the art at the time the invention was made to having the ferrous portion permanently embedded completely as suggested by Lindman in the shoe of the doll of Hay et al for the purpose of manipulating the toy.
